1. Rates are per 100,000 population and are age-adjusted by five-year age groups to the 2000 U.S. standard population based on single years of age. Counts and rates are suppressed when fewer than 6 cases were reported for the specific cancer.
2. Rates are per 100,000 and are age-adjusted to the 1996 Canadian population standard. Counts and rates are suppressed when fewer than 6 cases were reported for the specific cancer.
3. See Technical Notes, Section I, for NAACCR area inclusion criteria for the combined cancer statistics.
4. Abbreviations: S.E. - Standard Error; NH - Non-Hodgkin
