

The Inter-record Edits program runs SEER and NPCR inter-record edits on records in NAACCR layout version 11, containing both ICD-O-2 and ICD-O-3 coded cases and produces summary and detailed reports of inter-record edit errors. The Inter-record Edits program should be run after the 2010 combined edits have been run and all single- and inter-field edit errors have been corrected. For questions or information about the program or the inter-record edits, please call the NPCR help-line at (301) 572-0502 or send an e-mail to: npcr-css@orcmacro.com.
