## **Introduction**

Appendix A of the SSDI Manual is a listing of all the Schema ID's and relevant schema ID information. The information included in this appendix is part of the cancer registry software. This document can be used for a reference.

For surveillance and software purposes, every combination of primary site and histology must be accounted for in Summary Stage. The Summary Stage 2018 update was based on changes in AJCC 8<sup>th</sup> edition and how data has been collected historically.

Schema ID defines the assignment of the following as it applies to primary site(s), histology(ies) and Schema Discriminator fields-based results for:

- AJCC Chapter
- EOD Schema
- Summary Stage 2018
- Applicable site-specific data items (SSDIs)
- Grade Table
- AJCC ID
  - The AJCC ID identifies which of the primary site/histology combinations within the schema ID are eligible for AJCC 8<sup>th</sup> edition stage
