Developing an Information-Sharing Portal for Comparative Effectiveness Research: An ICF Approach
Qiming He, Kevin Zhang, Jagruti Rana, Shailendra Bhavsar, Syvella Kirby
ICF International, Fairfax, VA

Background of CER Project
- American Recovery and Reinvestment Act (ARRA) funded activities to enhance cancer registry data collection for Comparative Effectiveness Research (CER).
- CER data availability and sharing (1) datasets from registries, (2) longitudinal linked electronic health record (EMR) databases and (3) patient registries.
- Provide a way for registries to advise other registries on common cancer care patterns CER activities, and mechanisms where cancer registry data would be used to support the establishment of clinical trials and the establishment of formal partnerships.
- Elicit CER input and established Specialized Cancer Registries through a subset of NCORP funded Specialized Cancer Registries.
- The Special projects were selected to develop methods for innovative areas of cancer registries and cancer registry data sets.
- Each state registry can upload documents to the Dissemination folder.
- The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the Centers for Disease Control and Prevention.

Management Reporting

The aim of the information-sharing portal is to foster the information to one location, be shared with the other participating registries.

Collaboration

Technical assistance

The CCR participating registries submit technical assistance requests which are then reviewed by CDC and ICF staff and CCR then add advice to the pending request for the registry to then receive the technical assistance request that is then flagged as an ICF's ovals which then passed on the RIC's regional center to help share the information with other CER participating registries.

Main Features and Functions

Document Sharing

Each state registry upload depots to the dissemination folder within their own registry to share with registries. CDC and ICF staff then review the documentation from the dissemination folder and those reviewed are placed to the document sharing portal.

Home Page

Upcoming Meetings

- Information Sharing Training (4/5/2013)

New Documents/Files

- Data Dictionary (4/4/2013)

Request Monitoring

The Completed Technical Assistance Request Report list the CCR and ICF's belief in the process for handing technical assistance requests, important resource.

Benefits

- Provides a central point to look for various types of resources to enhance the data collection process.
- Provides a central point to look for various types of resources to enhance the data collection process.
- Provides a central point to look for various types of resources to enhance the data collection process.
- An efficient way to manage training and technical assistance requests.
- A centralized information-sharing portal allows CCR to easily disseminate information and guidelines to many other uses.

Acknowledgments

This project was funded as part of the American Recovery and Reinvestment Act (ARRA) Comparative Effectiveness Research activities through the Office of the Secretary's Contract Number: D10009-1079.

CER Information Sharing Portal – Why?

- CCR’s Comparative Effectiveness Research (CER) program required developing a sustainable method for rapid data collection and the expansion of data items collected through linkages and other means.
- The aim of the information-sharing portal is to foster the information to one location, be shared with the other participating registries.
- The portal allows CCR to maintain operational support to manage the portal (lists submission and lists requests). The portal also allows the technical assistance request to be very useful, the technical assistance request to be very useful.
- It is a centralized information-sharing portal that provides a convenient source for various registries.
- This is the process for handing technical assistance requests, important resource.
- An efficient way to manage training and technical assistance requests.
