Standards for Cancer Registries, Volume II
Data Standards and Data Dictionary, Record Layout Version 9
p. 51-62: Revised All footnotes in Chapter IX

Chapter IX
REQUIRED STATUS TABLE (ITEM # ORDER)

The following table presents version 9 of the NAACCR required status summarizing the requirements and recommendations for collection of each item by standard-setting groups. Differences from version 8 are marked "Revised", "New", or "Retired" in the "Note" column of the table. Summarized changes are in Appendix F.

The following abbreviations and symbols are used in the table:

NAACCR Exc	Refers to NAACCR minimum requirements for a data exchange record
NAACCR Inc	Refers to NAACCR recommendations for a central registry collecting incidence data
NAACCR Full	Refers to NAACCR recommendations for a central registry collecting incidence data plus treatment, detailed staging, and follow-up
NPCR	Refers to requirements and recommendations of the CDC's National Program of Cancer Registries
COC	Refers to requirements and recommendations of the Commission on Cancer of ACoS
SEER	Refers to requirements of the NCI's SEER Program

Special note: In the following table, NAACCR Exc, NAACCR Inc, and NAACCR Full are identified as Exc, Inc, and Full respectively.

Note: A new code has been added. + = See Chapter XI Data Dictionary for details related to required status for these data items.

Note: A new code has been added. ^ = these text requirements may be met with one or several text block fields.

Note: Source of Standard has been added to the Required Status Table in Version 9.

Note: The code # was revised from "funded by NPCR may" to "funded by NAACCR Full registries may."

Codes for Recommendations: R = required   S = supplementary/recommended   . = not in data set but available   O = optional   * = when available   @ = required for breast cancer only $ = requirements differ by year   # = Central registries may code available data using 1998 SEER or 1998 COC data items, codes, and rules. See Vol. 2, chap. V.   + = See Chapter XI Data Dictionary for details related to required status for these data items.   ^ = these text requirements may be met with one or several text block fields   Special note: Exc, Inc, and Full headings are NAACCR Exc, NAACCR Inc, and NAACCR Full.

CENSUS TRACT

Alternate Name	Item #	Length	Source of Standard	Column #
Census Tract/Block Numbering Area (BNA) (SEER)	110	6	SEER	56-61

Description

Code for the census tract of the patient's residence at the time of diagnosis for the reportable tumor. SEER used this field for cases reported before 1998. If the patient has more than one tumor, the codes may be different for each tumor.

Codes are those used by the U.S. Bureau of the Census. Census Bureau codes for block numbering area (BNA) are also entered in this field. BNAs were first used in the 1990 census, but were not used for the states of California, Connecticut, Delaware, Hawaii, New Jersey, Rhode Island, and the District of Columbia.

Both census tracts and BNAs have a 4-digit basic number and may also have a 2-digit suffix. Census tract numbers range from 0001.00 to 9499.99. BNA numbers range from 9501.00 to 9989.99. See the Census Bureau's "Area Classification"[31] for further details.

Rationale

Allows central registries to calculate incidence rates for geographical areas having population estimates. The U.S. Bureau of the Census provides population data for census tracts. Those rates can be used for general surveillance or special geographical and socioeconomic analysis.

Codes

Census Tract Codes   000100-949999
BNA Codes   950100-998999

000000   Areas not census-tracted
999999   Area census-tracted, but census tract is not available

CENSUS TRACT BLOCK GROUP

Alternate Name	Item #	Length	Source of Standard	Column #
	362	1	Census	187-187

Description

NAACCR has not adopted standards for this item.

CLASS OF CASE

Alternate Name	Item #	Length	Source of Standard	Column #
	610	1	COC	324-324

Description

For a hospital registry, divides cases into those included in reports on patient treatment and outcome (analytic) and those that are not included (nonanalytic). Class of Case codes 0-2 are analytic, i.e., were diagnosed and/or received all or part of their first course of treatment or had treatment planning at the reporting hospital or staff physician's office. Class of case codes 3-5, 8 and 9 are nonanalytic, i.e. received all of their first course of therapy at another institution or were diagnosed at autopsy or by death certificate only. Class of case 6 codes are analytic for diagnosis dates prior to January 1, 2000; they are non-analytic for diagnosis dates on or after January 1, 2000.

Codes
0   First diagnosed at the reporting institution since the registry's reference date and all of the first
    course of therapy elsewhere
1   First diagnosed and all or part of the first course of therapy at the reporting institution
2   First diagnosed elsewhere and treatment plan developed and documented and/or the first course
    of therapy given at the reporting institution after the registry's reference date
3   First diagnosed and all of the first course of therapy elsewhere
4   First diagnosed and first course of therapy at the reporting institution before the reference date of
    the registry
5   First diagnosed at autopsy
6   Diagnosed and all of the first course of treatment only in a staff physician's office
8   Diagnosis established only by death certificate *
9   Unknown *

Note: Codes 8 and 9 are used in central registries only.

DATE CASE REPORT RECEIVED

Alternate Name	Item #	Length	Source of Standard	Column #
	2111	8	NAACCR	996-1003

Description

Date the electronic or paper abstract is received by the central cancer registry from the reporting facility. Abstracts submitted via diskette and paper abstracts must be manually date-stamped. However, when diskettes are processed by the computer system, the Date Case Report Received can be supplied by the central registry for the batch of records. Abstracts submitted by modem or a file transfer protocol can automatically be date- and time-stamped by the computer system when the data arrive at the central registry.

This item is not yet well defined for use when a central registry is creating a transmission record for a consolidated tumor record from multiple case reports. NAACCR committees will continue to refine the definition. See Chapter V, Unresolved Issues, for discussion of differences between SEER and COC items.

DATE OF 1ST CRS RX--COC   (Revised)

Alternate Name	Item #	Length	Source of Standard	Column #
Date of First Course Treatment (COC) Date Started (pre 96 COC)	1270	8	COC	593-600

Description

Date of initiation of the first cancer-directed therapy for the cancer being reported, using COC definition of first course. The date of first treatment includes the date a decision was made not to treat the patient. See *ROADS*, 1998 Supplement for details.

Clarification of NPCR Required Status

Central registries funded by NPCR are required to collect either Data Item 1260 - Date of Initial RX--SEER or Data Item 1270 - Date of 1st Crs RX--COC.

DATE OF 1ST POSITIVE BX

Alternate Name	Item #	Length	Source of Standard	Column #
Date of First Positive Biopsy (COC)	1080	8	COC	468-475

Description

Date of first positive tissue biopsy/positive histology.

Codes (in addition to valid dates)
00000000   Positive biopsy never obtained

MORPH CODING SYS--CURRENT   **(Revised)**

Alternate Name	Item #	Length	Source of Standard	Column #
	470	1	NAACCR	240-240

Description
Code that best describes how morphology is currently coded. If converted, this field shows the system it is converted to.

Codes
1   ICD-O, 1st edition
2   ICD-O, 1986 Field Trial
3   ICD-O, 1988 Field Trial
4   ICD-O, 2nd edition
5   ICD-O, 2nd edition, plus REAL lymphoma codes effective 1/1/95
6   ICD-O, 2nd edition, plus FAB codes effective 1/1/98
7   ICD-O-3
9   Other

Note: Code 7 is the NAACCR standard.

MORPH CODING SYS--ORIGINAL   **(Revised)**

Alternate Name	Item #	Length	Source of Standard	Column #
	480	1	NAACCR	241-241

Description
Code that best describes how morphology was originally coded. If later converted, this field shows the original codes used.

Codes
1   ICD-O, 1st edition
2   ICD-O, 1986 Field Trial
3   ICD-O, 1988 Field Trial
4   ICD-O 2nd edition
5   ICD-O, 2nd edition, plus REAL lymphoma codes effective 1/1/95
6   ICD-O, 2nd edition, plus FAB codes effective 1/1/98
7   ICD-O-3
9   Other

RX HOSP--REG LN REMOVED

Alternate Name	Item #	Length	Source of Standard	Column #
Number of Regional Lymph Nodes Examined at This Facility (COC)	676	2	COC	345-346

Description
Describes number of regional lymph nodes examined as part of the first course of treatment. This item reflects that portion of the first course of treatment given at the reporting facility.

Rationale
If central registries wish to study the treatment given at particular hospitals, these hospital-level data items must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course treatment information on the case. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing the extent of treatment given at a particular hospital also helps resolve coding issues.

Codes
00 No regional lymph nodes examined
01 One regional lymph node examined
02 Two regional lymph nodes examined
..
..
90 Ninety or more regional lymph nodes examined
95 No regional lymph node(s) removed, but aspiration of regional lymph node(s) was performed
96 Regional lymph node removal documented as a samplings and number of lymph nodes
    unknown/not stated
97 Regional lymph node removal documented as a dissection and number of lymph nodes
    unknown/not stated.
98 Regional lymph nodes surgically removed but number of lymph nodes unknown/not stated and
    not documented as sampling or dissection
99 Unknown; not stated; death certificate only

SEER SUMMARY STAGE 2000   **(New)**

Alternate Name	Item #	Length	Source of Standard	Column #
	759	1	SEER	387-387

Description

Code for summary stage at the initial diagnosis or treatment of the reportable tumor. For hospital registries, COC requires its use in the absence of a defined AJCC classification. For site-specific definitions of categories, see SEER Summary Staging Manual 2000.

Summary stage should include all information available through completion of surgery (ies) in the first course of treatment or within four months of diagnosis in the absence of disease progression, whichever is longer.

Rationale

Stage information is important when evaluating the effects of cancer control programs. It is crucial in understanding whether changes over time in incidence rates or outcomes are due to earlier detection of the cancers. In addition, cancer treatment cannot be studied without knowing the stage at diagnosis.

Codes

0	In situ
1	Localized
2	Regional, direct extension only
3	Regional, regional lymph nodes only
4	Regional, direct extension and regional lymph nodes
5	Regional, NOS
7	Distant
9	Unstaged

Clarification of NAACCR and NPCR Required Status

Summary stage is required. The correct data item to use (and corresponding code manual) is determined by the year in which the cancer was diagnosed. Cancers diagnosed on or after January 1, 2001 should be assigned a summary stage according to SEER Summary Stage Manual 2000 and the code should be reported in Data Item 759 - SEER Summary Stage 2000. Cancers diagnosed before January 1, 2001 should be assigned a summary stage according to SEER Summary Stage Guide 1977 and the code should be reported in Data Item 760 - SEER Summary Stage 1977.

SITE CODING SYS--CURRENT (Revised)

Alternate Name	Item #	Length	Source of Standard	Column #
	450	1	NAACCR	238-238

Description
Code that best describes how the primary site currently is coded. If converted, this field shows the system it is converted to.

Codes
1   ICD-8 and MONTNAC
2   ICD-9
3   ICD-O, 1st edition
4   ICD-O, 2nd edition
5   ICD-O, 3rd edition
6   ICD-10
9   Other

Note: Code 5 is the NAACCR standard.

SITE CODING SYS--ORIGINAL (Revised)

Alternate Name	Item #	Length	Source of Standard	Column #
	460	1	NAACCR	239-239

Description
Code that best describes how primary site was originally coded. If later converted, this field shows the original coding system used.

Codes
1   ICD-8 and MONTNAC
2   ICD-9
3   ICD-O, 1st edition
4   ICD-O, 2nd edition
5   ICD-O, 3rd edition
6   ICD-10
9   Other

Standards for Cancer Registries, Volume II
Data Standards and Data Dictionary, Record Layout Version 9
p. 298: Revised Year First Seen This CA

VENDOR NAME

Alternate Name	Item #	Length	Source of Standard	Column #
	2170	10	NAACCR	981-990

Description
System-generated. Name of the computer services vendor who programmed the system submitting this data. Abbreviate as necessary and keep a consistent name throughout all submissions. Include software version number where available. Code is self-assigned by vendor.

Rationale
This is used to track which vendor and which software version submitted the case. It helps define the source and extent of a problem discovered in data submitted by a software provider.

VITAL STATUS

Alternate Name	Item #	Length	Source of Standard	Column #
	1760	1	SEER/COC	799-799

Description
Vital status of the patient as of the date entered in item 1750 (Date of Last Contact).

Codes
0 Dead (COC)
1 Alive
4 Dead (SEER)

YEAR FIRST SEEN THIS CA

Alternate Name	Item #	Length	Source of Standard	Column #
Accession Year (pre 96 COC) Year First Seen for this Primary (COC)	620	4	COC	325-328

Description
Year patient was first seen at the reporting institution for diagnosis and/or treatment of this primary, since the reference date of the registry. It is **not** the year that the registrar accessioned the case.

Rationale
This data item is used by hospital registries to organize their case reporting into individual years. It differs from the first four digits of the Accession Number, since the year is case-specific rather than patient-specific, and from the diagnosis year since it relates to the specific facility and not the tumor.

Central registries that wish to compare their data with hospital case lists can make use of this field to create equivalent reports.
