RX HOSP--SCOPE REG 98-02

(New Field)

Alternate Name	Item #	Length	Source of Standard	Column #
	747	1	COC	480-480

Description

Describes the removal, biopsy, or aspiration of regional lymph node(s) at the time of surgery of the primary site or during a separate surgical event at the reporting facility. This field is to be used for ROADS codes after the ROADS to FORDS conversion. It is also to be used to code Scope of Regional Lymph Node Surgery at the reporting facility for all cases diagnosed before January 1, 2003.

Rationale

In evaluating quality of care and treatment practices it is important to identify the removal, biopsy, or aspiration of regional lymph node(s) at the time of surgery of the primary site or during a separate surgical event.

If central registries wish to study the treatment given at particular hospitals, the hospital-level treatment fields must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course of treatment for the tumor. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing the extent of treatment given at a particular hospital also helps resolve coding issues.

Codes:

Note: See the COC *ROADS Manual*, 1998 Supplement, (COC Coding System #2140, code 7) and the SEER Program Code Manual, (RX Coding System #1460, code 5) 1998 for site-specific codes.

RX HOSP--SURG OTH 98-02

(New Field)

Alternate Name	Item #	Length	Source of Standard	Column #
	748	1	COC	481-481

Description

Records the surgical removal of *distant* lymph nodes or other tissue(s)/organ(s) beyond the primary site at this facility. This field is to be used for ROADS codes after the ROADS to FORDS conversion. It is also to be used to code Surgery Other Regional/Distant Sites at the reporting facility for all cases diagnosed before January 1, 2003.

Rationale

The removal of non-primary tissue documents the extent of surgical treatment and is useful in evaluating the extent of metastatic involvement. If central registries wish to study the treatment given at particular hospitals, the hospital-level treatment fields must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course of treatment for the tumor. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing what part of the treatment was given at a particular hospital also helps resolve coding issues.

Codes

Note: See the COC *ROADS Manual*, 1998 Supplement, (COC Coding System #2140, code 7) and the SEER Program Code Manual, (RX Coding System #1460, code 5) 1998 for site-specific codes.

RX HOSP--SURG SITE 98-02

(New Field)

Alternate Name	Item #	Length	Source of Standard	Column #
	746	2	COC	478-479

Description

Describes surgical procedures used to treat the primary site of the reportable tumor. This item records that portion of the first course of treatment given at the reporting facility. This field is to be used for ROADS codes after the ROADS to FORDS conversion. It is also to be used to code Surgery Primary Site at the reporting facility for all cases diagnosed before January 1, 2003. See Chapter V, Unresolved Issues, for a discussion of differences in treatment coding among groups and over time.

Rationale

If central registries wish to study the treatment given at particular hospitals, the hospital-level treatment fields must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course of treatment for the tumor. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing what part of the treatment was given at a particular hospital also helps resolve coding issues.

Codes (in addition to the site-specific codes)

- 00 No cancer-directed surgery performed.
- 99 Unknown if cancer-directed surgery performed.

Note: See the COC *ROADS Manual*, 1998 Supplement, (COC Coding System #2140, code 7) and the SEER Program Code Manual, (RX Coding System #1460, code 5) 1998 for site-specific codes.

RX SUMM--SCOPE REG 98-02

(New Field)

Alternate Name	Item #	Length	Source of Standard	Column #
	1647	1	SEER/COC	941-941

Description

Describes the removal, biopsy or aspiration of regional lymph node(s) at the time of surgery of the primary site or during a separate surgical event at all facilities. This field is to be used for ROADS codes after the ROADS to FORDS conversion. It is also to be used to code Scope of Regional Lymph Node Surgery at all facilities for all cases diagnosed before January 1, 2003.

Rationale

In evaluating quality of care and treatment practices it is important to identify the removal, biopsy, or aspiration of regional lymph node(s) at the time of surgery of the primary site or during a separate surgical event.

If central registries wish to study the treatment given at particular hospitals, the hospital-level treatment fields must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course of treatment for the tumor. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing the extent of treatment given at a particular hospital also helps resolve coding issues.

Codes

RX SUMM--SURG SITE 98-02

(New Field)

Alternate Name	Item #	Length	Source of Standard	Column #
	1646	2	SEER/COC	939-940

Description

Site-specific codes for the type of surgery to the primary site performed as part of the first course of treatment. This includes treatment given at all facilities as part of the first course of treatment. This field is to be used for ROADS codes after the ROADS to FORDS conversion. It is also to be used to code Surgery Primary Site at all facilities for all cases diagnosed before January 1, 2003.

Rationale

If central registries wish to study the treatment given at particular hospitals, the hospital-level treatment fields must be used. The summary treatment fields, conversely, combine information across all hospitals that provide first course of treatment for the tumor. Hospital-specific fields allow studies of detailed referral patterns and treatment by type of hospital. Knowing what part of the treatment was given at a particular hospital also helps resolve coding issues.

Codes (in addition to the site-specific codes)

- 00 No primary site surgery performed.
- 99 Unknown if primary site surgery performed.

Note: See the COC *ROADS Manual*, 1998 Supplement, (COC Coding System #2140, code 7) and the SEER Program Code Manual, (RX Coding System #1460, code 5) 1998 for site-specific codes.
