

## NAACCR CFD Edits Metafile Change Log

### NAACCR Call for Data Metafile

10/8/21 Update

- *N5021 Surgery, RX Date Surgery, Schema ID (COC) was updated.*
  - An older version of this edit was incorrectly included in the NAACCR Call for Data Metafile.
  - The updated version of the edit is consistent with the edit in the NPCR-CSS edits metafile, the DMS edits, and the v21 NAACCR Edits Metafile.
    - The older version of the edit could potentially identify errors that would not be identified in the updated version.
    - The new version of the edit should not identify errors that would not be identified in the older version.
- NAACCR CINA Edits-Canada edit set
  - Several edits related to summary have been removed from the Canadian edit set.

NOTE: Changes are relatively minor. If a registry has already cleared all edits using the previously posted edits metafile, there is no need to run the submission file through the updated version.

### Inter-Record Edits

10/8/21

Please see the version 5.2.7 release notes below. During testing some registries identified a significant number of duplicates based on IR16.
