

NAACCR Standards for Cancer Registries Laboratory Electronic Pathology Reporting Guidelines

Summary of Changes from version 5.0 to 5.1

1. Table 2 under "1.5.3 LOINC Coding for Reports" was removed and consolidated with a nearly identical table in "2.7.2. Observation Request Segment (OBR)," following the description for LOINC coding in OBR-4 (Universal Service ID).
2. "CAP eCC" changed to "CAP eCP" everywhere in HL7 messages.
3. "CAPECC" changed to "CAPECP" everywhere in HL7 messages.
4. LOINC text for 11529-5 changed from "Surgical Pathology Study Report" to "Surgical pathology study" in multiple places.
5. Corrected codes used in OBR-4 and OBX-3 for synoptic primary path report, synoptic consult report, and synoptic addendum report.
6. Added notes to NAACCR Item 7190 as well as included NAACCR Item 7195 for ORC-21.1 - Path Ordering Facility Number.
7. Corrected typos in the HL7 field used to flag a type of report from OBX-25 to be OBX-11.
8. Corrected typographical errors in the numbering of OBX segments in sample synoptic segmented report.
9. Corrected the CAP eCC synoptic report template version ID.
10. Corrected example provided for PID-3 Patient Identifier List to show use of National Provider Identifier (NPI) and that the "Required" sub-components of PID-3.1 and PID-3.4 were populated. PID-3.5 – PID-3.10 are all "Required or Empty".
11. Corrected URL to CDC's Race/Ethnicity Code Sets (PID-10 and PID-22).
12. Added guidance and mapping on preferred provider identifiers for PV1-7, PV1-8, PV1-9, OBR-16, and OBR-32.
13. OBR-32 has been changed to "Required" from "Required or empty" and the definition was changed to reflect best contact.
14. Corrected flow diagrams and included guidance and sample code for reporting cases with multiple SPM segments.
15. Added guidance for completing OBR-44 Procedure Code to identify test as a surgical procedure or biopsy only.
16. Added LOINC code to OBX-3 table to report Pathology diagnosis ICD Code.
17. Corrected NAACCR Usage in table for SPM-29 to be CE.
18. Major changes to Chapter 3, including many corrections and new information on the OBX implementation of repeating data elements.
19. Updated Appendix B User-Defined tables;
 - a. Revised User-Defined Table 0005– Race with correct values
 - b. Revised User-Defined Table 0088 – Procedure Codes with new values
 - c. Revised User-Defined Table 0189 – Ethnic Group with correct values.
20. Major changes to Appendix E to conform with Chapter 3 changes.
21. Added NAACCR Items 7580, 7590, and 7600 that had previously been omitted from Appendix F table.
22. Added a document history table to track changes over time.
23. Updated the Laboratory Electronic Pathology Reporting Guidelines data dictionary.
24. <Changes to repeat data elements in CAP eCPs>.
